

Apeldoorn, 03-08-2026

To whom it may concern,

This statement relates exclusively to the packaging materials used by Etigam for the packaging, storage, transport and distribution of its products.

Etigam utilizes a wide range of packaging formats, including but not limited to:

- Folding cartons
- Corrugated shipping boxes
- Plastic films and wraps
- Pouches
- Other packaging components used for the protection and distribution of Etigam products

Based on currently available information and supplier declarations, Etigam confirms that the packaging materials used for its products and placed on the European market comply with the applicable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

For the relevant packaging types, Etigam maintains packaging specific compliance documentation, including Declarations of Conformity (DoCs) and associated Conformity Assessments.

Due to the extensive variety of packaging formats, dimensions and product configurations used throughout the Etigam product portfolio, Declarations of Conformity are maintained and controlled individually for each packaging type. Consequently, packaging specific Declarations of Conformity are not routinely distributed with products or provided as part of standard commercial documentation.

Customers, distributors and other legitimate stakeholders may request a packaging specific Declaration of Conformity by identifying the relevant packaging type. Upon request, Etigam may provide the applicable Declaration of Conformity together with the corresponding Conformity Assessment for the identified packaging type.

The Declaration of Conformity and Conformity Assessment are supported by underlying technical documentation. Such supporting documentation contains confidential and supplier specific information and is therefore not disclosed to customers or other third parties. This documentation remains under the control of Etigam and is made available only to authorities where required by applicable legislation.

On behalf of Etigam,
Sincerely,

G. Bogaard
Manager QA and R&D
